

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ashley Pezzner on 1/16/2009.

Cancel claim 30.

In claim 22, after "a sulfonyl group are recovered" insert "wherein the functional group capable of reacting with the activated carboxyl group is chosen from an amino group, which is optionally monoalkylated, a hydroxyl group or a thiol group".

The following is an examiner's statement of reasons for allowance:

The instant amendments clarify the recited functional group. In this regard, the closest prior art, US 7138538, fails to teach or suggest the step of reacting an activated carboxyl group with the recited functional group.

With regard to any double patenting issue over 11/664571, the examiner notes that the instant application is earlier filed, see MPEP 804 ("If a "provisional" nonstatutory obviousness-type double patenting (ODP) rejection is the only rejection remaining in the earlier filed of the two pending applications, while the later-filed application is rejectable on other grounds, the examiner should withdraw that rejection and permit the earlier-filed application to issue as a patent without a terminal disclaimer.").

Applicant's authorization of the amendment does not constitute acquiescence in any rejection, but made solely to expedite issuance of the captioned application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
